## **Detailed Action**

This action is in response to the application filed on 12/5/06.

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Invention K: Claims 77-91, 92-106 & 107-121 is directed to a system, method and network for bill payment-invoice generation system

Invention L: Claims 122, 126 & 130 + 123, 127 & 131 is directed to a system for bill payment for transfer of funds

Invention M: Claims 124,128 & 132 + 125, 129 & 133 is directed to a method performing a financial transaction.

Invention K-M are related as combination and subcombination. Inventions in the relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP 806.05(c)). In the instance case, the combination as claimed does not require the particulars of the subcombination as claimed. Each combination is described above where in no invention combination identified does not perform the other combinations invention.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and

specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
